

System Conditions Update

Based on the current system conditions, the system-wide curtailment watch for SoCalGas and SDG&E that was issued on July 19, 2018, will end effective 12:00 PM PCT on Friday, July 20th.

New Curtailment Watch to begin 7:00AM PCT Monday, July 23, 2018:

System conditions remain dynamic, and with the expected high temperatures next week and associated increase in demand for natural gas electric generation, a system-wide curtailment watch will be reinstated by SoCalGas starting 7:00 AM PCT on Monday, July 23 and until further notice for SoCalGas and SDG&E service territories. Customers may be required to reduce their natural gas use if a curtailment is issued. Continue to monitor ENVOY (<https://scgenvoy.sempra.com>) for further updates.

Please contact your Account Representative or the SoCalGas Scheduling Department should you have any questions.
